Facial Recognition Software with Mask & Head detection camera

[CHALLENGE]

Manually marking attendance is time consuming for employees. They may often forget to punch in and punch out in office premises. The Uncertainty about the accurate time and proxy are the real problems.

Enterprises face security threats when an unofficial person enters the building without verification.

Manual payroll management system requires personnel and excessive time for calculations to provide error-free data by manually checking attendance records that takes a lot of time.

The recruitment of workforce to perform their job responsibilities for employee scheduling, time and attendance, security, legal compliance and more.

The epidemic, Covid-19 devastated the systems of businesses and escorted new trends like social distancing, temperature checks, sanitizing and wearing face masks for the health purpose.

SAAS BASED COMPLETE SOLUTION

Facial Recognition Software with Mask & Head detection camera

[STRATEGY]

Strategizing leads to ideal businesses and out of the box productivity. The face recognition software revamps the security system entirely. Just plug in and ready to use device scans the face and compares the data gathered with samples collected in software database for granting or refusal of access. Meanwhile it also tracks the time and attendance of authorized member without any effort. By maintaining the SOP'S in such widespread, this contact-less device works flawlessly. The thermal scanner in device detects the high body temperature and alerts the staff members to take precautionary steps for safety. The program saves hours of hours in payroll calculations, depending on the attendance and time. The whole procedure takes place in just few seconds.

03 — [ADVANCE REPORTING]

Facial Recognition Software with Mask & Head detection camera

[SOLUTION]

VIEU is the one solution to multiple problems. The main root cause of such challenges is to replace the manual system with automated software. Now no further need for biometrics or to touch anything.

VIEU is a face recognition software device that enables its camera to detect the entrant's face for verification. The intruder or unauthorized person will no longer be able to gain access.

This Hassle free operating system automatically tracks down the time and attendance of employees without being physical. Moreover it leads to the analysis of data required for the calculations of monthly payrolls that cuts down the manpower.

In Covid-19, the leading factors in VIEU that magnifies its existence from other technologies is that it is the cautious and fast method to grant or deny access by checking the body temperature and the face mask.

01 — WORKS FOR YOU & YOUR USERS

02 — EASY TO USE AND SET UP

03 — INFALLIBLE TECHNOLOGY

Facial Recognition Software with Mask & Head detection camera

[RESULT]

Conclusively, VIEU technology penetrated into the market all over the world and became client's first choice in every aspect. This evolving software streamlined the company's practices by automating the processes including verification, attendance, payrolls and more. The advanced features of this device reduced workforce by leaving the results impactful. Now-a-days the face recognition software is in high demand among many schools, universities, hotels and even events like concerts, seminars and so on and so forth. Increased security, trouble free program, less time consuming, labour cost savings, no human error, improved surveillance efforts and easy integration are among the top class factors that delighted our trusted clients around the globe.

Therefore, today VIEU is called the VISUAL POWER!
